Why Travelers Need Medical Travel Insurance for OSCA Exchanges

Medical travel insurance is required for all travelers.

- **Limited U.S. Coverage Abroad:** Medicare and many U.S. health insurers do not pay for medical care received outside the country.
- **Billing Challenges:** Overseas medical providers often require upfront payment and are unlikely to bill U.S. insurance directly. Travel insurers, however, are equipped to handle international claims quickly and accurately.
- **Claim Processing Expertise:** Travel insurers understand foreign medical billing codes and can process claims efficiently, helping travelers avoid costly delays or confusion.

- **Recommended Coverage:** A minimum $100,000 is recommended. $1,000,000 is preferred but harder to get for travelers 70+.
- **Medical Evacuation:** At least $100,000 recommended.
- **Coverage Type:** 100% after deductible preferred.
- **Include:** Pre-existing condition coverage (if offered).
- **Primary payer plans are preferred**- they pay claims directly.
  - Some secondary plans will also pay upfront and later coordinate benefits with your main insurer.
